EXAMINER'S AMENDMENT

This examiner's amendment is a supplemental action in response to a correction of the amendment submitted April 3, 2006, by the Examiner, indicating an incorrect title change. The following amendment indicates the corrected title change as set forth below.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Leonard Holts (RN 22,974) on March 22, 2006.

The application has been amended as follows:

In regards to claim 5, lines 2-3, the phrase "the spatial phase distribution measuring portion" has been replaced with --a spatial phase distribution measuring portion--.

In regards to claim 7, line 1, the phrase "the control unit" has been replaced with --a control unit--.

In regards to claim 9, line 10, the phrase "a means provided" has been replaced with --a means for wavefront compensation provided--

In regards to the title, the original title of "Microscope" has been changed to --Microscope with Wavefront Compensation--

Examiner's Reasons for Allowance

Claims 1-9 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

As to claims 1 and 9, the prior art of record, taken alone or in combination, fails to disclose or render obvious the use of a wavefront compensator and a wavefront aberration removal section affiliated with the removal of aberration created by the wavefront compensator in a microscope utilizing a spatial phase modulator to shape first and second beams to excite electrons in a molecule for measurement, in combination with the rest of the limitations of claims 1 and 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 2003-26,796, filed on February 4, 2003.

Pertinent Prior Art

The prior art of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of record is Iketaki et al. (USPN 6,859,313).

Iketaki discloses a microscope comprising a spatial phase modulator to shape first and second beams to excite electrons in a molecule for measurement of fluorescence due to an overlapping of the first and second shaped beams.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marissa J. Detschel whose telephone number is 571-272-2716. The examiner can normally be reached on M-F 8:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory J. Toatley, Jr. can be reached on 571-272-2059. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
